

Senior C# Developer - Hull – 55k-60k

The opportunity to join a small dynamic and growing company where you can make a difference. This lead developer role is a hands-on coding role in an exciting start-up. You will be the main coding developer creating our scalable serverless function driven product while maintaining the management web app. This is a brand new position where you can put your own mark on the job role.

About Cloud Design Box

At Cloud Design Box, we create cutting-edge education solutions to make the blended classroom thrive. We also provide innovative business solutions for multi-national companies domestically and internationally.

We now have an established and growing team based at Hull's bustling Fruit Market district. We put employee wellbeing at the forefront of what we do. Our company is a family that promotes a caring, open and positive environment in which your input and ideas are encouraged and nurtured.

The Role

You will be based flexibly, both at home and at our office in Hull. C4DI has world class facilities and there are plenty of events to learn and grow through the community. Surrounded by a talented community of digital start-ups within C4DI, we are an exciting new business, and your job will be to help us grow (and have fun along the way). As our team grows, you will be expected to work with and build up our junior developers.

Skills and Experience

Our products integrate Microsoft School Data Sync with Azure Active Directory, Office 365, Teams, SharePoint, and other products. Although mainly written in C# they use several different technologies to integrate with all the different systems, from Office 365 Graph and CSOM web APIs.

The product has been developed over the last 3 years to provide a scalable solution for provisioning value added features to Microsoft's current School Data Sync offering.

The solution has been developed by contractors and we are now looking to bring on a developer in-house to manage the solution and scale up our development resources. Our long term plan is to grow a development team around the lead developer over the next few years.

We require experience with the following:

Experience and interest in cloud based scalable technologies are crucial to this role (Azure, AWS or similar).

- Web applications (ASP.net Core or similar)
- Azure Dev Ops (or similar)
- Serverless Functions
- SQL
- Version Control Software
- Graph API endpoints
- React and HTML front ends
- GitHub

For a Cloud Native Senior C# Developer we would also be expecting agile skills, especially test-driven development.

This role is working with sensitive data, we require an enhanced DBS check is carried out.

Benefits

As a growing business, we expect this role and team to grow with the company. We pride ourselves on developing people and there will be the chance to develop yourself through training courses. Our party planning committee organise regular social events both inside and outside of the office, bringing a sense of team spirit to a hybrid workforce.

- Competitive Salary of £55k to £60k per year
- 25 days paid holiday per year plus bank holidays
- A chance to work on the latest technologies (especially Office 365 and Azure)
- Flexibility in working hours when required
- Expenses paid on any business travel
- The opportunity to attend some conferences/events/training during the year
- Wellbeing support including mental health awareness course, opportunity to be a wellbeing champion and getting support from our wellbeing officer

How to apply
