

Engage, inspire, and connect your employees

Transform communication and elevate your ethos with a state-of-the-art intranet

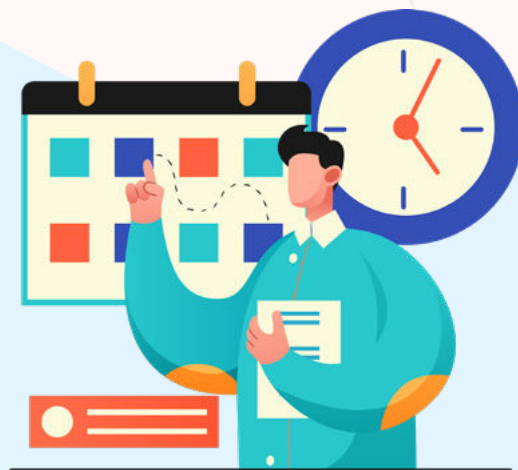

Addressing common organisational challenges

In today's competitive business environment, seamless communication, collaboration, and efficient information management are essential for success.

However, many organisations face challenges that hinder their productivity. How many of the following sound familiar?

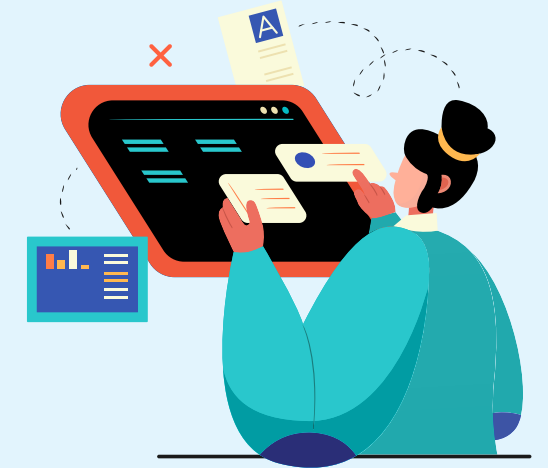

Colleagues from different departments and office locations struggle to connect and collaborate

Time-consuming and inconsistent information management processes that lack structure

Information overload, with important documents scattered across multiple systems, making it hard for staff to find what they need

Document security and governance: do you know exactly who has access to your sensitive information, and where it's stored?

Ineffective and inconsistent internal communications

At Cloud Design Box, we understand these challenges. Our intranet solutions are designed to help streamline communication, improve collaboration, maximise adoption, and ensure secure information management across your organisation.

Let us help you to create a more connected, efficient and productive workplace.

A modern-day intranet to unite your workforce

An intranet is an invaluable corporate resource that allows you to publish central services and resources to staff members across the organisation in a structured and secure way. It's a great place to share news and information with ease on one, standardised communication platform.

Your intranet is also the place for departments to come together with a unique set of tools to assist with communication and collaboration, including a staff directory and news centre.

With a Cloud Design Box intranet you also get training for your technical staff as well as guidance for your marketing and communications teams on how to create beautiful SharePoint sites and news articles.

Building your intranet in SharePoint

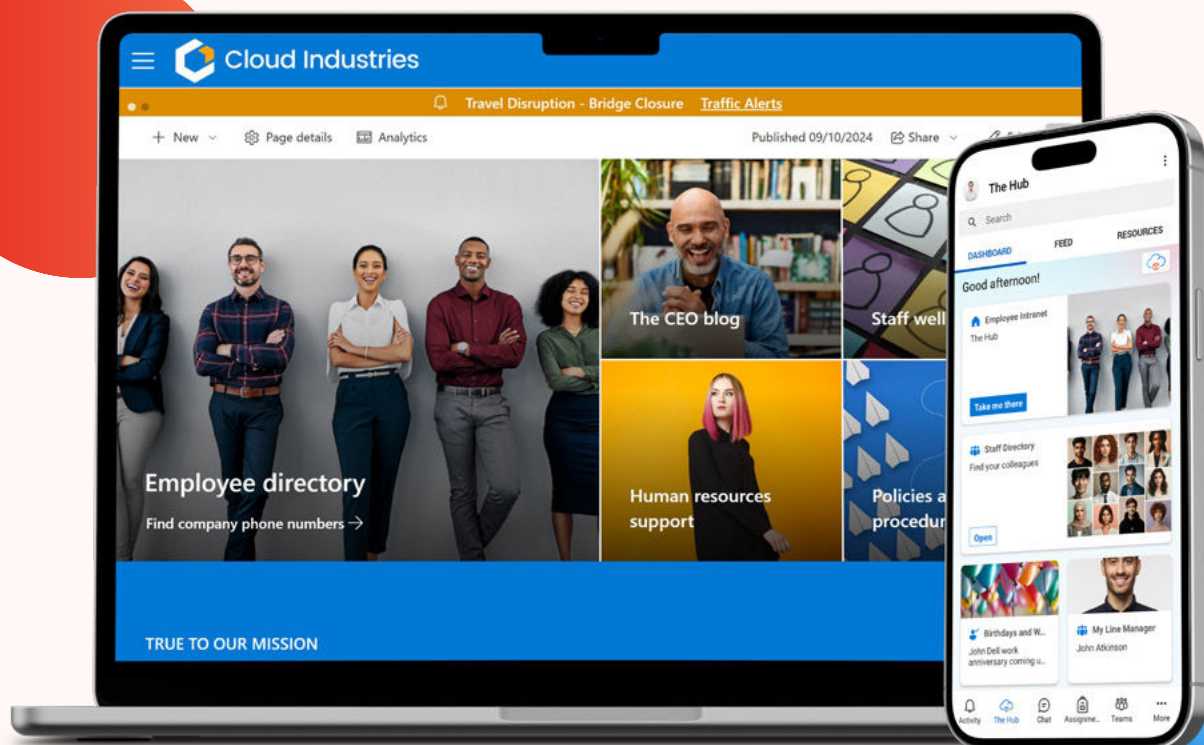

All too often organisations that have invested in Microsoft 365 fail to maximise their return on investment.

That's why we developed Cloud Design Box, to help organisations **harness the full potential of Microsoft 365, SharePoint and Teams**.

We do this in two ways:

1. We build a **powerful intranet** solution with you to help improve organisation-wide and targeted communication that better **engages, inspires and connects** your employees.
2. We then provide **comprehensive training, and ongoing support**, designed to ensure your entire team is **using the new platform** as it was designed to be used.

Our innovative approach to maximising user adoption means that everyone will be able to share and manage content, knowledge, and applications which empowers teamwork, enables information to be found quickly, and fosters collaboration across your business.

New starters love it—they often comment on how easy it is to find everything they need to know during the onboarding process.

Maximise your investment in Microsoft 365

A Cloud Design Box solution comes with a host of benefits to positively impact your organisation.

Improve internal communications

By centralising key documents, enabling real-time updates, or targeting alerts only to specific teams, you can quickly improve communications and ensure employees stay informed.

Reach everyone, everywhere

Allow remote and office-based staff to access essential documents, updates, and tools securely, ensuring seamless engagement and alignment across the organisation, regardless of location.

Communicate your ethos

Build cohesion and keep your employees informed with streamlined internal communications that help tell your company's story with a consistent look and feel.

Boost employee engagement

By encouraging communication, recognition, and knowledge sharing, a Cloud Design Box intranet empowers all of your employees to connect, contribute, and stay informed.

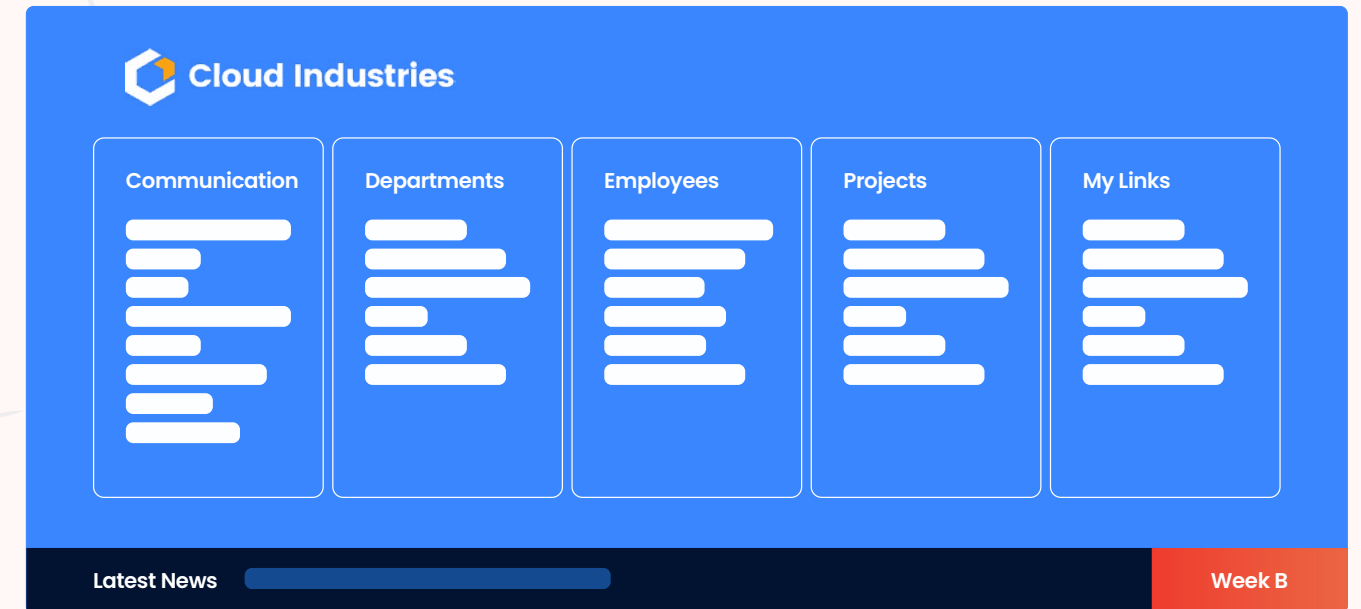

Work better together

Empower teamwork with dynamic and productive team sites for every project, department, and division. Collaborate effortlessly across PCs, Macs, and mobile devices.

Increase efficiency and productivity

Reduce the time spent looking for information with powerful search functionality. Intelligent ways to discover information, expertise, and insights help inform decisions and guide action.

Easy-to-use, tailored, secure and structured menu

Meet, chat, call, and collaborate

Of course you still have all the functionality of Microsoft Teams, to remove barriers between places and people so that your organisation, no matter how disparate, can work together in one virtual space.

Better data governance

With built-in compliance features, audit logs, and permission management, you can maintain data integrity, monitor usage, and comply with regulatory standards.

Unrivalled service and support

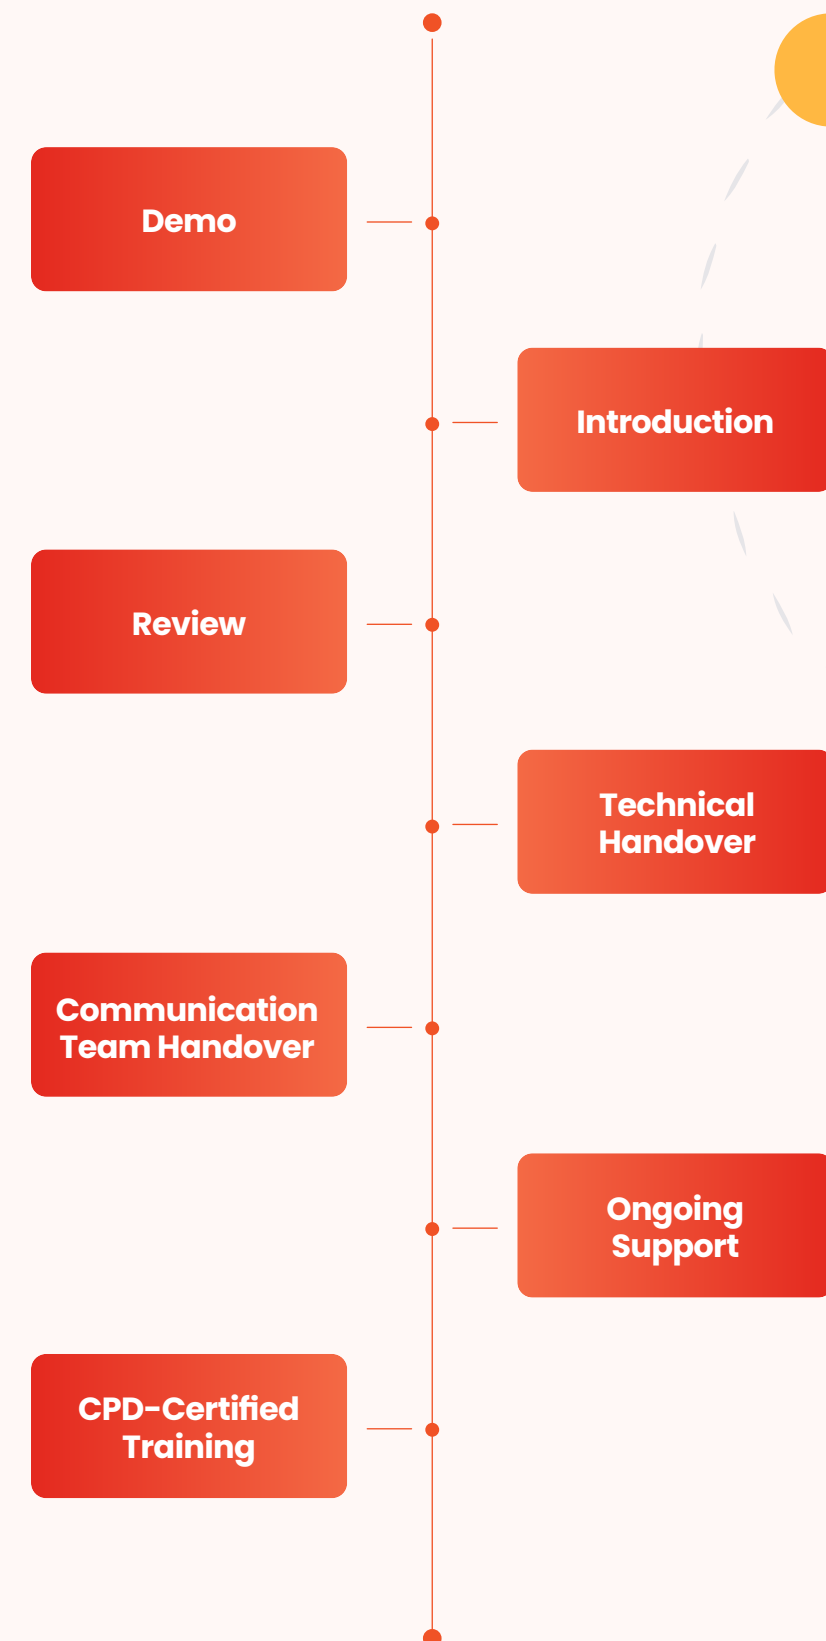

Over 98% of our customers stay with us year after year. That's not just because we've got a fantastic product – once live, we are on-hand to support you all year round.

As a Microsoft Global Training Partner, our CPD-certified training sessions help everyone in your team to get up to speed and quickly gain confidence in your new set-up so you can harness the full potential of Teams and SharePoint.

We don't just offer unlimited technical support, we also provide unlimited end user support for those tasked with updating your site, so they always look professional and on-brand.
